Welcome Note

Welcome to the **14th International Sports Science Conference (ISSC) 2026**, where innovation, collaboration, and transformation come together to shape the future of sports and health sciences.

This year, we are proud to present the theme: **"Sports Science for a Sustainable Future: Transforming Performance and Health Worldwide"**

The **14th ISSC 2026** aims to explore the dynamic intersection of sports science and technological advancement, with a strong emphasis on how artificial intelligence and innovation are revolutionizing performance, training, rehabilitation, and overall health. Importantly, our discussions and presentations extend beyond the athletic arena — we also focus on the broader population, highlighting how sports science can enhance the health, fitness, and wellbeing of individuals at all levels of physical activity, including recreational movers and the public.

This conference serves as a vibrant platform for researchers, practitioners, professionals, and enthusiasts from diverse backgrounds to exchange knowledge, address current challenges, and create opportunities for multidisciplinary collaboration. Whether you are in elite sports, community health, education, or fitness and wellness, **ISSC 2026** offers valuable insights for everyone.

We invite you to be part of this exciting journey — where science meets innovation, and where the impact of our work reaches both athletes and everyday individuals striving for better health and performance.

Together, let us transform the future of sports and health science.
